Certificate II in Business
Finish Date: 2019
Institution: YMCA

High School
Finish Date: 2019
Institution: Willetton Senior High School

PERSONAL TECH PROJECTS

- View my web apps at shivamdokania.com ('Projects' section).
  - Scholar Mind: AI-driven research tool that answers questions using peer-reviewed literature databases. Answers from trusted journals.
  - Calorie Tracking Web App: Track calories by searching the USDA and Open Food Facts database.
- Raspberry Pi Projects: Set up a home automation system controlling lights and sensors using Python scripts; created a personal media server for storing and streaming files across devices.
- Hosted projects on AWS (EC2) and a Raspberry Pi server, gaining practical experience with deployment, server setup, and basic networking.
- Developed Python automation scripts on Raspberry Pi for system monitoring and task automation.
- Leveraged artificial intelligence tools to support the design, optimisation, and debugging of web applications, improving development efficiency and code quality.
